Hi Kim,

I worked on the charge questions for the asthma/allergy consultations. I'm also going to include some more studies in the tables - taking studies from phthalates and other chemicals that look at asthma/allergy, so we're having a discussion that's broader than formaldehyde. And I need to check each of the study entries to make sure we have all the relevant info from the studies. But this should give you a clearer idea of what we're looking for from the panels.

Glinda
